

LAKSHMI NARAYANA CHEEPURU

Andhra Pradesh, India

Mobile : +91 82470-72870

Email: lakshminarayanacheepuru@gmail.com

CAREER OBJECTIVE

EEE undergraduate seeking entry-level opportunities in Core Electrical or IT domains to apply technical knowledge, programming skills, and problem-solving abilities.

EDUCATION

B.Tech – Electrical & Electronics Engineering

JNTUK University College of Engineering, Narsaraopet | 2023 – 2026

CGPA: 7.29 (till date)

Diploma – Electrical Engineering– 83%

S.M.V.M Polytechnic, Thanuku | 2020 – 2023

Secondary Education (10th Class) – 95%

AP Model High School, Srikakulam | 2020

TECHNICAL SKILLS

Core Subjects:

Power Electronics, Control Systems, Electrical Machines, Power Systems, Substation Design Basics

Programming Languages:

Python (Intermediate), C (Basic), Java (Fundamentals)

Tools & Software:

MS Word, MS PowerPoint, Basic Electrical Simulation & Analysis Concepts

INTERSHIPS /TRAINING

Industrial Training – Andhra Sugars Limited (Diploma)

- Completed 6-month industrial training at The Andhra Sugars Limited with exposure to electrical machinery operations and maintenance.
- Gained hands-on experience in house wiring, installation practices, safety procedures, and fault identification.

Substation Design Internship

- Learned substation layout planning, bus bar configurations, and protection schemes.
- Studied major components such as transformers, circuit breakers, and grounding systems.
- Gained understanding of electrical safety and power distribution reliability.

Electric Vehicle Internship

- Learned EV architecture including battery management systems and motor drives.
 - Studied charging technologies and powertrain operation.
 - Understood applications of power electronics in electric vehicles.
-

PROJECTS

Priority Based Load Shedding with Power Factor Control (B.Tech)

- Designed load shedding system based on priority levels.
- Implemented power factor monitoring to improve power efficiency.
- Improved reliability of electrical distribution during peak demand.

Automatic Water Level Controller (Diploma)

- Developed automated tank monitoring system using sensors.
 - Controlled motor operation based on water level detection.
 - Reduced water wastage and improved system efficiency.
-

SOFT SKILLS

Communication • Teamwork • Time Management • Adaptability • Problem Solving

LANGUAGES

Telugu • English • Hindi
